Include Patient Health Experience Data in Your Research
Lunch & Learn Information Session
Thursday, December 16, 2021, 12:00-1:00

Are you interested in research that incorporates the patient experience with different health conditions? Come learn how to leverage the UW Health Experiences Research Network (UW HERN) patient experience data to support/supplement/inform YOUR research on the following health conditions:

- Breast Cancer
- Cancer Risk that Runs in Families
- Depression in Young Adults
- Traumatic Brain Injury in Veterans

Also learn about ICTR funding opportunities for competitive research proposals per the ICTR Pilot Award Program.

- **When:** Thursday, December 16, 12:00-1:00 p.m.
- **Where:** Zoom (link will be sent out after you RSVP)
- **RSVP:** Please register for this meeting by clicking HERE. After signing up you will receive a confirmation email with information about joining this meeting.
- **Questions?** Contact Kate Judge at kjudge@wisc.edu

This information session will answer the following questions:

- **What data are available and how can health researchers use it?** Learn how you can leverage existing video/audio clips and interview transcripts of patients' experiences with various health conditions for YOUR health research.
- **What is the UW Health Experiences Research Network (HERN)?** Learn about this ICTR-CAP program, its portfolio of research on patient experiences with different health conditions, and the rigorous qualitative research methodology used in all UW HERN studies.
- **Is there funding available?** An overview of the ICTR Pilot Award Program funding opportunities and RFA will be provided. See here for more: https://ictr.wisc.edu/funding-opportunities/

This event is offered by UW ICTR Community-Academic Partnerships (ICTR-CAP) program, the ICTR Pilot Award Program, and the UW Health Experiences Research Network (HERN).
